Peace Evangelical Centre Kindergarten

Name of School

23-24

School Year

K3

Grade Level

#### Name of Activities

23-24 Ocean Park nature experience learning activity

#### Objectives of Activities

Objectives:

1. To visit the "Grand Aquarium" and have up-close encounters with coastal creatures, allowing children to understand the wonders of nature.
2. To participate actively in an interactive puppet show, where children discover the methods and importance of marine life protecting themselves.
3. To develop an attitude of caring for animals and the environment.

#### Summary of Activities

The "Ocean Park Nature Experience Learning" activity has successfully concluded, and the children gained a lot from it. Through the professional guided tours and close encounters with marine life, the children developed a deeper understanding and awe for the wonders of nature. Conservation officers performed an interactive puppet show, allowing the children to learn about the threats posed by marine debris to marine animals and the importance of protecting the marine environment.

This activity fully utilized the advantages of experiential learning, allowing the children to learn while playing and play while learning. It nurtured their curiosity, respect, and love for nature, and instilled in them a sense of responsibility for environmental conservation. We hope that the children will take these valuable experiences back home and apply them in their daily lives, practicing an attitude of caring for animals and the environment.
